

Nguyễn Đức An

Software Engineer

Birth: 16/01/2003

Phone: +84 0986 849 821

Email: nguyenducan.1601@gmail.com

Address: Ho Chi Minh, Viet Nam

Overview

With three years of experience in web and mobile development using ReactJS and React Native, I have successfully built interactive, responsive applications that deliver great user experiences across both web and mobile platforms. My familiarity with various web and mobile technologies within the JavaScript ecosystem allows me to create seamless and engaging user interfaces. I am committed to continuous learning and am always eager to explore new technologies and best practices, ensuring that I remain relevant in the rapidly evolving world of software development.

Education

GIA DINH UNIVERSITY (2021 - 2025)

Major - Software Engineering

GPA: 8/10

Skills

Front-End Development: : HTML, CSS, JavaScript, TypeScript, ReactJS, React Native, TailwindCSS, Redux, RESTful API, Responsive Design, UI/UX Optimization

Tools & Technologies: Visual Studio Code, IntelliJ IDEA, GitHub, GitLab, Postman, Figma (UI/UX Prototyping)

Soft Skills: English - Technical Reading & Comprehension

Work experience

01/2023 – 05/2023

Full-Stack E-commerce Website (Student Project)

Developed an e-commerce website using React, Node.js, and MongoDB.

Built cart, login, and order management features.

Deployed the app with responsive UI on a cloud platform.

07/2023 – 03/2025

ZENS COMPANY – Frontend Developer (React & React Native)

Developed web and mobile apps with React and React Native.

Integrated APIs, managed state with Redux, optimized performance.

Worked in Agile teams and participated in code reviews.

05/2025 – Present

DFM-EUROPE – Frontend Developer (React & React Native)

Implemented new features for web/mobile apps using React stack.

Collaborated with backend team, used TypeScript and Styled Components.

Improved UI/UX, participated in CI/CD and user feedback cycles.

Projects

Athena AI - Mobile Developer

(07/2023 – 01/2024)

Descriptions	Athena AI is an innovative platform powered by OpenAI models. It offers advanced features like content generation, AI chat, and AI image creation. With customizable templates, speech-to-text, and text-to-speech capabilities, it supports diverse projects. The platform also includes live chat support, a powerful admin panel for easy customizations, and multi-language support. Discover the future of content creation with Athena AI and unlock limitless possibilities.

Projects

Movenjoy - Mobile Developer

(11/2024 – 05/2025)

Descriptions	Ridenjoy is an innovative active mobility lifestyle app designed to make cycling and walking safer and more enjoyable. The app integrates location-based services (Joy Stops), augmented reality (AR) gamification (Joy Beacons), and phygital event challenges to encourage active travel. Users can explore their surroundings, participate in interactive challenges, and collect geo-located Joy Points by cycling across different locations. Ridenjoy enhances urban mobility by merging technology with real-world exploration, fostering a fun and engaging experience for all active travelers.
