

Nguyễn Đức An

Full Stack Developer

Email: nguyenducan.1601@gmail.com

Phone: +84 0986 849 821

Address: Ho Chi Minh, Viet Nam

Portfolio: <https://portfolio-annguyens-projects.vercel.app>

Overview

Full Stack Developer with 3+ years of experience building web and mobile applications using ReactJS, React Native, Node.js, and Express. I have worked on both frontend and backend, including building user interfaces, APIs, and handling data between systems. I enjoy improving performance and building features that are reliable and easy to maintain, while working closely with teams in Agile environments.

Education

GIA DINH UNIVERSITY (2021 - 2024)

Major - Software Engineering

GPA: 3.2/4.0

Skills

Frontend: ReactJS, React Native, Electron, Angular, HTML, CSS, JavaScript, TypeScript, TailwindCSS, Redux, Three.js

Backend: Node.js, Express.js, Authentication / Authorization, API Integration

Database: MongoDB, MySQL, PostgreSQL

Soft Skills: English – Technical Reading & Communication, Team Collaboration, Problem Solving, Agile/Scrum

Work experience

01/2023 – 05/2023

Full-Stack E-commerce Website (Student Project)

- Developed a full-stack e-commerce platform using React, Node.js, Express, and MongoDB
- Built RESTful APIs for authentication, cart, and order management
- Designed MongoDB collections and handled data persistence
- Deployed application with responsive UI on cloud platform

07/2023 – 03/2025

ZENS COMPANY – Frontend Developer (React & React Native)

- Developed and maintained React & React Native applications serving X+ users
- Optimized Redux state structure, reducing unnecessary re-renders and improving performance
- Collaborated with backend team to integrate REST APIs and handle edge cases
- Participated in code reviews, sprint planning, and Agile ceremonies

05/2025 – Present

DFM ENGINEERING – Full Stack Developer (React & React Native & Nodejs + Express)

- Developed end-to-end features across web and mobile platforms using React, React Native, Node.js, and Express
- Built and integrated RESTful APIs using Node.js/Express to support data communication between frontend and backend systems
- Improved data consistency and reduced synchronization issues between 2D UI and 3D modules
- Optimized performance for complex 3D rendering and reduced unnecessary re-renders in React applications
- Implemented API validation, error handling, and data processing logic in backend services

Airport Tan Son Nhat T3 - Website Developer
(8/2025 – Present)

Descriptions	- Interactive airport navigation system built to help users locate key areas (check-in counters, boarding gates, service zones) within Terminal 3 - Provides indoor routing, location search, and real-time flight information to improve navigation efficiency
Responsible task	- Developed interactive airport map using ReactJS and Three.js for 3D visualization - Implemented indoor routing algorithms and location search functionality - Integrated RESTful APIs to fetch map data and flight information - Optimized rendering performance and improved UI responsiveness for smooth interactions - Collaborated with backend services to ensure accurate data synchronization - Utilized AI-assisted tools (Cursor) to enhance development efficiency
Technical skill	- ReactJS, Redux - Node.js, RESTful API - Three.js - AI-assisted Development

IHMGas - Website Developer
(6/2025 – 08/2025)

Descriptions	- Desktop application for industrial gas analysis built with Electron, React, and TypeScript - Supports gas mixture unit conversion, operating condition calculations, and data export (CSV/Excel)
Responsible task	- Developed a desktop application using Electron, ReactJS, and TypeScript for gas analysis workflows - Implemented calculation logic for gas mixture conversion and operating conditions based on industry standards - Built data processing modules and tables for gas compositions and operating parameters - Developed user interfaces for data input, configuration, and result visualization - Implemented CSV/Excel export functionality for analysis results
Technical skill	- ReactJS, TypeScript - ElectronJS - Data Processing, CSV Export

Finance – Website & Mobile Developer
(04/2024 – 10/2024)

Descriptions	• Financial platform providing features such as account management, budgeting, and investment tracking • Supports user interaction through web and mobile interfaces with real-time data handling
Responsible task	• Developed responsive web and mobile interfaces using ReactJS and TypeScript • Implemented booking flow for users to schedule consultations with financial advisors • Managed application state using Redux and integrated RESTful APIs • Collaborated with a 6-member Agile team to deliver features and improve user experience
Technical skill	• ReactJS, TypeScript • Redux • RESTful API • Responsive Design (Web & Mobile)

Movenjoy - Mobile Developer
(11/2024 – 05/2025)

Descriptions	• Mobile application for active mobility, integrating map-based services and location tracking • Provides route navigation, location discovery, and interactive features to enhance user experience
Responsible task	• Developed mobile application features using React Native and TypeScript • Implemented map-based functionalities including route search, location display, and real-time navigation • Managed application state using Redux for map data, user sessions, and UI states • Built and deployed the application for both Android and iOS platforms • Improved performance and UI/UX based on user feedback
Technical skill	• React Native, TypeScript • Redux • Firebase • Map & Location Services • Android & iOS Build
